

Cisco Networking Products

**Carrying Cisco's full line of products is the least we could do.
After all, you carry your company's network on your shoulders.**

Summit Information Resources is an independent reseller of Cisco networking products. Whether you need equipment now, or if you're just estimating expenditures for later, we'll work up a quote for you quickly so you can get back to more important things. If you don't see what you're looking for listed below, contact us and we'll track it down for you.

Routers: Create a smarter, more responsive integrated network with adaptive and resilient technologies.

Switches: Cisco switches help maximize network value by providing optimal support for your business requirements while protecting your investment.

Security: The Cisco Self-Defending Network now includes enhanced e-mail and web security capabilities for more comprehensive protection.

Wireless: Enhance your company's productivity through the freedom and flexibility of wireless networks.

Interfaces and Modules: Deploy data and voice capabilities in an integrated routing platform to increase productivity, decrease costs and lower the cost of ownership.

Voice and Unified Communications: Cisco is helping customers transform their businesses by moving away from transactional communications to collaboration.

Cisco Networking Products

Cisco IOS Software: Cisco IOS Software delivers a seamless integration of technology innovation, business-critical services and hardware support.

Network Management: Network management tools help you automate, simplify and integrate your network to reduce operational costs and improve productivity.

Optical Networking: Cisco optical technology accelerates service delivery through remote provisioning across Ethernet-enabled, dense wavelength-division multiplexing (DWDM) networks.

Universal Gateways and Access Servers: Current market conditions enable service providers to increase revenue by offering wholesale VOIP (Voice over Internet Protocol) services.

Video, Cable and Content Delivery: Video, IPTV, cable and content delivery solutions deliver a compelling array of services and applications for businesses, service providers and consumers.

TelePresence: The Cisco TelePresence Meeting solution creates a live, face-to-face meeting experience over the network, empowering you to interact and collaborate like never before.
